Summary

I like learning new things that interest me and applying them in my daily life. I was secretary of academics at school and also participated in a lot of sports events such as athletics, football, basketball, etc. I played divisional level badminton for my school (doubles) and unfortunately ended up losing out on the qualification for the state level tournament in the finals. Even though I lost I'm grateful for the experience I gained and next time I'm sure I'll go farther.

I never really felt that I liked computer science during school and it seemed rather meh. But since joining college I've been surrounded by tech nerds. This has helped me develop an interest in programming and learning about various technologies. I learnt about Linux and the various components of an operating system. I am proficient in various programming languages such as python, C/C++, Java and am currently learning about various web technologies (HTML/CSS, JS, React, Node, etc.). I would like to make this my career on day so that I don't have a boring job but an interesting and satisfying one.

Apart from programming and tech I also love drawing and listening to music and sometimes playing the piano. I'm also an otaku and like watching anime and reading manga xD (Most of my drawings are those of anime / manga characters).

Experience

Student

VIT University (Chennai Campus)

Sep 2020 - Present (2 years +)

Education

VIT University (Chennai Campus)

Bachelor of Technology - BTech, Computer Science Engineering

Sep 2020 - Mar 2024

Currently studying Computer Science at VIT Chennai.

Don Bosco Matriculation Higher Secondary School

High School Diploma, Computer Science

Sep 2020 - Apr 2024

Licenses & Certifications

Certificate of Completion - Recipe API Backend Web Development bootcamp - DevTown

Certificate of Completion - Recipe API Backend Web Development bootcamp - Microsoft Learn Student Ambassadors

Certificate of Completion - Recipe API Backend Web Development bootcamp - Google Developer Group Ranchi

Course Completion Certificate - The Joy of Computing using Python - NPTEL

Certificate of Completion - First Step Korean - Yonsei University

Certificate of Completion - Programming for Everybody (Getting started with Python) - University of Michigan

Skills

Education • Leadership • English • Problem Solving • Hindi • Tamil • Malayalam • French • Japanese • Korean
